### REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

Upon remand of this application from the Board of Patent Appeals and Interferences to considered whether the rejection of claims 15-16, 19-21, and 24-25 under the "Recapture Doctrine" remains appropriate, in view of the precedential opinion *Ex Parte Eggert*, it has been determined that the rejection of claims 15-16, 19-21, and 24-25 under the "Recapture Doctrine" is no longer appropriate. The rejection of claims 15-16, 19-21, and 24-25 under the "Recapture Doctrine" has been withdrawn.

The following limitation was added to claim 1 to obtain allowance of the patent claims in the original application for patent:

"a bearing cartridge separably fastened within said diffuser core;  
said bearing cartridge carrying axially spaced bearings which surround and rotatably support said drive shaft."

The above limitation has been modified in the independent reissue claims as follows:

Claim 15:

"a bearing cartridge including an elongated housing having a bearing disposed therein, said bearing cartridge separably fastened to ~~within~~ said diffuser core,

Art Unit: 3745

said bearing ~~cartridge carrying axially spaced bearings which surround~~  
surrounding and rotatably supporting ~~support~~ said drive shaft,”

Claim 20:

“a bearing cartridge including an elongated housing having the bearing disposed  
therein, said bearing cartridge separably fastened to within said diffuser core,

said bearing ~~cartridge carrying axially spaced bearings which surround~~  
surrounding and rotatably supporting ~~support~~ said drive shaft,”

Original application claim 1 was drawn to a pump assembly and did not include the bearing cartridge limitations. Original application claim 4 which depended from application claim 1 added a bearing cartridge carrying axially spaced bearings. Original application claim 7 was drawn to the combination of a pump assembly and a bearing cartridge carrying axially spaced bearings. It is clear from the remarks on page 5 of the amendment of July 24, 1995 (paper no. 6) of the patent file that applicant gave up the general pump assembly structure of claim 1 (without a bearing cartridge), and relied upon the inclusion into application claim 1 of a bearing cartridge having axially spaced bearings (originally set forth in application claim 4) as the basis for obtaining the patentability of patent claim 1.

The reissue claims broadened the limitation of the “bearing cartridge” by deleting “said bearing cartridge carrying axially spaced bearings”, but the reissue claim is still narrower than

Art Unit: 3745

the claim would be without the limitation (i.e., the claim before any "bearing cartridge" limitation was added to obtain allowance). The proposed reissue claims 15 and 20 are not "broader" for recapture analysis because the entire bearing cartridge limitation has not been removed, as mandated by the precedential opinion *Ex Parte Eggert*.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
